ABOUT ME

Junior Software Developer focused on full stack development. I've worked with technologies like React, Node.js, and MongoDB, and I'm passionate about building clean, functional, and user-friendly applications. Always eager to learn and grow in collaborative environments.

EXPERIENCE

2024 – 2025 | FREELANCE FULL STACK DEVELOPER SOS – SERVICIOS O SOLUCIONES INTEGRALES

Developed a desktop application to remotely monitor and control industrial refrigeration machines. The project involved full stack development, including:

- **Front end:** Built with React and Vite, packaged as a desktop app using Electron.
- **Back end:** Developed with Node.js and Express.js to handle API logic and data processing.
- **Databases:** Integrated MongoDB for structured data and InfluxDB for time-series data.
- **Communication:** Implemented secure communication with machines using the MQTTS protocol.
