ABOUT ME

Junior Software Developer focused on full stack development. I've worked with technologies like React, Node.js, and MongoDB, and I'm passionate about building clean, functional, and user-friendly applications. Always eager to learn and grow in collaborative environments.

EXPERIENCE

2024 – 2025 | FREELANCE FULL STACK DEVELOPER
SOS – SERVICIOS O SOLUCIONES INTEGRALES

Designed, proposed, and developed a cross-platform desktop application to remotely monitor and control industrial refrigeration systems.
Handled the entire development process, including:

- **Front end**: Built with React and Vite, packaged as a desktop app using Electron.
- **Back end**: Developed with Node.js and Express.js to handle API logic and data processing.
- **Databases**: Integrated MongoDB for structured data and InfluxDB for time-series data.
- **Communication**: Implemented secure communication with machines using the MQTTS protocol.

SKILLS

Technologies most Recently Used:
- **Languages & Frameworks:**
  - JavaScript
  - Node.js
  - React
  - Angular
- **Databases**:
  - MongoDB
  - InfluxDB
  - MariaDB
- **Tools**:
  - Git
  - GitHub
  - Postman

Languages
- **Spanish**: Native
- **English**: Intermediate

EDUCATION

2023 - NOW | AZUL SCHOOL

Online Software Development Courses with Certification in:
JavaScript · Node.js · React · Angular · Python · Git and GitHub

2017 - 2021 | CENTRO DE ENSEÑANZA TECNICA INDUSTRIAL (CETI)

Technical High School – Technologist Program (Software Development)
